

To: Chairman and members,
Delta Protection Commission
Comments from the public:
Ernst report #13 to the Delta Protection Commission

FOR THE RECORD

December 16, 1993

Sirs:

I. This report coincides with the conclusion of both your first year of activity as a Commission and my first year of Public Comments at each of these meetings. With it I want to again reaffirm my HOLIDAY BEST WISHES which are contained in my "FOR THE RECORD" sheet placed at your places before the meeting. I have enjoyed getting to know and come to respect each one of you as an individual.

II. This does not contradict my personal and professional views about the mission of this Commission as a governing agency.

- 1) This Commission's mission is contrary to the physical and mental health of the individuals living in the region you intend to govern.
- 2) This Commission's mission is in opposition to the spirit and the intent of that form of government which calls for elected representation, and respect for individuals and their right to own and use property.
- 3) This Commission's mission contradicts the basis on which this union of states was founded and the basis on which California became a member state in that union, ie a nation founded under God with inalienable rights preserved to the citizen to prevent tyranny over the people by the government.

III. I want to ask each Delta Commissioner here to let me know what county you live in. The five Supervisors and three City appointees I know. I am not sure of the Water District appointees. What do I intend to do with that information? Why should you worry? This information is already in Legislative Counsel's data bank, Franchise Tax Board, state maintained voter registration files, DMV, etc. You are already each one known by name as "legally" appointed to rule over the privately owned land in this zone. For those reluctant to let me know, I ask, would my personal possession of this information, as a known identified individual, be more dangerous to you than are those faceless bureaucracies listed above?

IV. State and fed appointees are controlling vast segments of our citizen behaviors, lives and our private property, by their tax filled pursestrings. They have vast potentials now for selective finings and jailings and a proprietary-like control of our private property (like, as if they are the owners).

How many of you here are "doing what it takes to keep your job?" In my work as a physician in Napa and Solano County a few years back, I saw good people, up to their eyeballs in debt who were doing mean, even sadistic things affecting not only the health but the lives of my elderly and ill patients. That was the basis of my October 1985, 24 page report to Assemblyman Don Sebastiani titled "California Community Care Licensing Is Killing My Patients." Those good people responsible for "killing my patients" were "doing what it takes to keep their jobs." I suspect several of you may also be doing the same, "doing what it takes to keep your job", including perhaps mandated membership on this Commission. There comes a time in a person's live when he does have to decide to face his personal responsibility for his actions, including how he earns his livelihood. NO ONE outside the military is mandated by the state to keep his job. At whose expense do I live? At whose expense are you keeping your job?

Respectfully,

F H "Doc" Ernst Jr
